

# IMMUNISATION TABLE

The table below shows the timetable for immunisations but your GP or health visitor should remind you when the next one is due. Try to stick to the immunisation schedule that your GP gives you, because the earlier your child is immunised the better protected they are.

Contains ibuprofen

| Age immunisation is given                 | Diseases protected against  | Name of vaccine                                      | Details                                 |
|---|---|--|---|
| Two months old                            | Diphtheria, tetanus, pertussis (whooping cough), polio and Haemophilus influenzae type b (Hib) Pneumococcal infection | DTaP/IPV/Hib + Pneumococcal conjugate vaccine, (PCV) | Date:<br>Time:<br>Location:<br>Contact: |
| Three months old                          | Diphtheria, tetanus, pertussis, polio and Haemophilus influenzae type b (Hib) Meningitis C                            | DTaP/IPV/Hib + MenC                                  | Date:<br>Time:<br>Location:<br>Contact: |
| Four months old                           | Diphtheria, tetanus, pertussis, polio and Haemophilus influenzae type b (Hib) Meningitis C, Pneumococcal infection    | DTaP/IPV/Hib + MenC + PCV                            | Date:<br>Time:<br>Location:<br>Contact: |
